

# DWPPL-122

## DESCRIPTION AND USE:

**DWPPL-122** is a high strength Calcium Hypochlorite. **DWPPL-122** has a wide range of applications and can be used wherever chlorination is required. Being in granular form, **DWPPL-122** is easy to handle. Due to its high available chlorine, much lower quantities of **DWPPL-122** are required to achieve desired level of chlorine. It has higher stability compared to other chlorine compounds such as Bleaching powder and Sodium Hypochlorite and hence can be stored for longer periods. **DWPPL-122** is highly soluble in water and does not give rise to any sludge. It does not affect the pH/ alkalinity of water when dosed to achieve normal chlorine levels. Due to its versatility, **DWPPL-122** can be safely used in Swimming Pools, Drinking Water, Aquaculture and Processing, Canneries, Dairies, Meat Processing, Industrial Water Treatment, Cooling Towers, Waste Water Treatment, Textile Industry, Fruits and Vegetable Packaging, Leather Industry, Paper Industry, Sugar Industry, Poultryes, Hotels and Hospitals.

## CHEMICAL FEEDING AND CONTROL:

**DWPPL-122** can be dosed directly or in the form of aqueous solution, depending on the requirement of the system, it can be dosed continuously or periodically. Our Technical representative will guide you on the optimum dosage for your system.

## TYPICAL PROPERTIES:

**Appearance:** White Granular Form

**Odor:** Typical Chlorine

**Solubility:** Completely Soluble in water

**Available Chlorine:** 65 % *minimum*

## SAFETY AND HANDLING:

Store in a cool dry place. In accordance with good safety practice, handle with care and avoid contact with skin. For more information, Material Safety Data Sheet is available on request.

## PACKING:

**DWPPL-122** is available in various packing sizes, i.e., 45 Kg, 10 kg and 5 Kg drums
