

**Circular Screen Separator**

## APPLICATIONS

- DRY SEPARATION: division of different dry materials on the basis of particle size
- DRY CLASSIFICATION: precise division of dry material to sized fractions
- SOLIDS / LIQUID SEPARATION: dewatering or concentration of solids, classification of liquids
- SOLIDS CLASSIFICATION IN LIQUID MEDIUM OR WET CLASSIFICATION:  
Precise division of material into fraction in Liquid Medium

## SALIENT FEATURES

- Quick & easy screen change
- Longer screen life
- High capacity in limited space
- Minimum Screen blinding
- No transmitted Vibrations

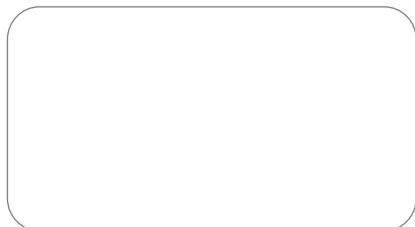

## INDUSTRIES SERVED

- |                   |              |                            |
|-------------------|--------------|----------------------------|
| • FOOD            | • SPICES     | • CEREALS                  |
| • TEA             | • PLASTICS   | • SPRAY                    |
| • COFFEE          | • POLYMERS   | • DRIED PRODUCTS           |
| • PHARMACEUTICALS | • COAL       | • PAINTS                   |
| • NEUTRACEUTICALS | • CARBON     | • PIGMENTS                 |
| • BEVERAGES       | • DETERGENTS | • FERTILIZER               |
| • SUGAR           | • GLASS      | • SAND                     |
| • CEMENT          | • FLOUR      | • MINERALS                 |
| • IRON ORE        | • EDIBLE OIL | • DEWATERING APPLICATIONS. |
| • WOOD CHIPS      |              |                            |
