

Pharma Screen

SALIENT FEATURES

Customized Solutions

- Adequate material Inlet
- Inspection Window for Operation Monitoring
- Can be provided with CIP ball spray

Leak tight screen fitting

- Perfectly locating of screen to avoid any leakage
- Less material retention on screen
- Provided with quick openable toggle clamp

Super tight screen

- Super tight wire mesh fitted on sturdy frame.
- Silicon molding on border and specially developed silicon gasket on fitting edge.
- No welding, No lead soldering, No crevices.

Excellence in fabrication

- No joints in bottom discharge can
- Joint less dome helps in equal material distribution over area
- Easy washdown

Lockable / Movable Caster Wheels

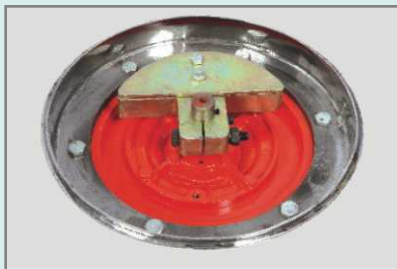

- Lockable / Movable Caster wheels for free movement of equipment.
- Wheels molded from polyurethane.

Motion Generator

- Perfectly designed Motion Generator, sturdy, robust construction Silent in operation.
- Oversized roller bearings for longer life and to sustain heavy vibrations.

Unbalanced Weight

- Geometry of unbalanced weight gives excellent tilting effect to the material on screen
- Different flow patterns of materials can be generated by changing relative positions of unbalanced weights.

Minimal screen blinding

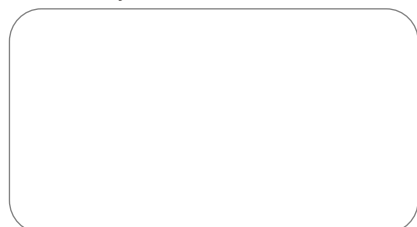

- Minimum screen blinding because of super tightness of screen fixing and tilting effect generated by motion generator
- Life of screen increases drastically than ordinary screens available in market

No sharp Corners

- All welded joints perfectly finished, ground and polished to 220 Grit.
- Special motor guard for safety and protection
- Specially developed spring locators for dampening
