# About Us

Since its inception in 1998, M/s. Innovative Automation Pvt. Ltd. today has established itself as one of the Largest Manufacturer and Supplier of Pre-piped Gas Trains, Burner Management Systems and Ignition Panels and Leading System Integrators and suppliers of Industrial Combustion Equipment in INDIA.

The Company Directors have over 25 years of experience in the Combustion Controls Business. They Guide a very Technically Strong team of Engineers for Sales, Support and after sales Services. We provide you assistance with accurate selection and sizing of the Products and on-site Installation assistance on request.

For the most advanced Technology products IAPL has tie-ups with Industry's Leading Manufacturers of Gas Safety & Regulation Devices and Burner Control Products in the World. We are strongly associated with M/s. MADAS s.r.l. – ITALY, M/s. CONTRIVE s.r.l. ITALY and HONEYWELL. IAPL had earned many Awards from its Principals for its outstanding performance on the Business.

Huge Inventory levels of Products and Spares ensure least Delivery periods and expeditious Service and Support.

We are committed to supply to our customers the Best Quality Products and Services and have always lived up to the expectations of our Customers. Thus, making us the most preferred suppliers for all the Major Burner, Furnace and Combustion Equipment manufacturer in INDIA.

We have our In-house Testing Facility, equipped with Latest Technology Instruments. Making M/s. Innovative

Automation Pvt. Ltd. one of the Few suppliers of Gas Trains in INDIA to provide Flow and Pressure Testing Certificates for the Gas Trains supplied by us. Our clients are also Welcome for Factory Inspection of the Products before Dispatch.

Our Products and Gas Trains are exported to all parts of the World. Malaysia, U.A.E., Iran, Nigeria, Ukraine, Tanzania, Nepal are few countries to be named.

## GAS TRAINS

Prepiped And Customised Gas Trains

- IAPL offers Gas Trains in Standard and Custom Configuration and Construction. Since, The Gas Trains is the essential Part of Gas Burner Safety, IAPL Gas Trains are Manufacture on line of NFPA 86 Burner & Boiler Safety Regulations.

Gas Trains

Straight Design Prepiped Gas Trains

Loop Design Prepiped Gas Trains

## GAS PRESSURE REGULATORS & FILTER REGULATORS

- The function of the Gas Pressure Regulator is to reduce the High Pressure Inlet Fuel Gas to a Lower Pressure required by the Combustion Chamber and to maintain the Pressure at the Preset Pressure value.
- Highly Precise Pressure Regulation.

Gas Pressure Regulators and Filter Regulators 2 Bar

Gas Pressure Regulators with Inbuilt Safety Shut off 5 Bar

Gas Pressure Regulators with Inbuilt Safety Shut off 2 Bar

Gas Pressure Regulators and Filter Regulators for Small User

## SLAM SAFETY SHUT OFF VALVE

Safety Shut Off Valves, also called as Slam Shut Off Valves or Over Pressure Shut Off valves protect the Low Pressure Rating Components after the Gas Pressure Regulator in case of accidental increase of Outlet Pressure.

Pressure Relief And Vent Valves

Pressure Relief Valves

Slam Shut Off Valve

## CONTRIVE BURNER CONTROLLERS

Contrive burner controller are meant for gas & oil burners.

Quad Burner Controller

Burner Controller

UV Flame Sensors

Gas Burner Controller

## ACTUATORS AND MOTORISED OPEN SOLENOID VALVES

Actuators and Motorised valves , a motorized valve actuator includes an electric drive motor having a rotatable shaft for providing an actuating torque.

Honeywell Modulating Motors

Honeywell Hercule Series Actuators

Motorised Butterfly Valves

Motorised Adjustable Port Valves

## HONEYWELL PANEL & FIELD INSTRUMENTS

HONEYWELL Panel & Field Instruments consist of PID Controllers is a generic control loop feedback mechanism (controller) widely used in industrial control systems.

PID Controllers

PID Controllers

PID Controllers

DCP Programmable Profile  
Controllers

## FLOW AND PRESSURE TRANSMITTERS

Flow can be measured with many types of sensors: pressure transducers, bubblers, shaft encoders, or ultrasonic sensors. The location where you are measuring water level, the accuracy required. Flow & Pressure Transmitters are effectively used for many types of fluid.

Honeywell Pressure Transmitters

OVAL Oil Flow Meters

Water Flow Switches

## OTHER PRODUCTS:

Gas Filter

Manually Reset Type Normally Closed Solenoid Valves

Automatic Reset Type Normally Open Solenoid Valves

Automatic Closed Type Normally Closed Gas Solenoid Valves

# Factsheet

Year of Establishment : 1998

Nature of Business : Importer, Supplier, Distributor, Manufacturer, Exporter,  
Wholesaler, Service Provider, Trader

Total Number of Employees : 11 to 25 People
