

PPA – 7566 Lite

PHENALKAMINE EPOXY HARDENER

Phenalkamine **PPA – 7566 Lite** is Mannich base, a reaction product of distilled cashew nutshell liquid & polyamine. It is a low viscosity, fast drying curing agent. Formulator can develop epoxy systems which are **VOC** compliant i.e. solvent less or high solids epoxy coating systems. In general, it shows ability to resist moisture, while curing & exhibits rapid cure, even at low temperatures, similar to other phenalkamines.

Storage & Stability

Hardener **PPA – 7566 Lite** should be stored in a cool dry place at 18 - 25 ° C in the sealed containers to achieve shelf life of minimum one year. Product can react with moisture & carbon dioxide in the air. This may result in increased viscosity & reduced activity.

Handling Precautions

May be harmful if ingested or absorbed through the skin & can cause sensitization. Will cause severe inflammation in contact with eye & skin. Wash thoroughly after handling. Adequate ventilation is essential during application. Containers should be tightly closed when not in use or during transportation. Do not inhale mist or vapors. It is recommended to use gloves, safety glasses & protective clothing for safe handling.

First AID

In case of

- Inhalation** : Remove to fresh air & give oxygen if breathing is difficult.
- Ingestion** : Give plenty of water. Do not induce vomiting. Contact a physician.
