## Reverse Osmosis Plants:

Reverse Osmosis, also known as hyper filtration, is the finest filtration known. This process will allow the removal of particles as small as ions from a solution. Reverse osmosis is used to purify water and remove salts and other impurities in order to improve the color, taste or properties of the fluid.

**Domestic Reverse Osmosis Units**

**Institutional Reverse Osmosis Systems**

**Industrial Reverse Osmosis Plants**

**Skid Mounted Industrial Reverse Osmosis Plants**

# RevOs Aqua Systems

## Filtration Plants:

In filtration plants of water or effluent is done with the intention of removal of suspended solids and organics which impart a certain taste and odor to the water. Filtration can be done by:

**Sand Filter**

**Carbon Filter**

**Iron, Manganese &  
Arsenic Removal Filter**

**Bag Filter**

# RevOs Aqua Systems

## Effluent Treatment and Sewage Treatment Plant:

RevOs Aqua offers wide range of waste water treatment plants applicable to textile mills, slaughter houses, diaries, paper mills, oil refineries, cold rolling mills, glass factories, chemical and processing industries etc.

**Effluent Treatment Plant**

**Tertiary Treatment For  
Effluent Treatment Plant**

**Sewage Treatment Plant**
