finally brings out
the Truth

GODREJ 3RD EYE

THROWS
LIGHT
ON
FAKES

Gone are the days when document fraud was done by sophisticated criminals who had access to high quality printing equipment and were considerably skilled in forgery.

But today, due to the easy availability of colour photocopiers, computers, scanners etc., counterfeiting has become a very simple proposition. Leading to deluge of counterfeit documents in the market place.

Protect yourself from this menace:

Godrej presents "3rd Eye" the superior ultraviolet light based suspect document detector. An excellent first line tool used extensively to detect and identify genuine documents.

Security Features: New issues of currency notes, Master, Visa, American Express and Diners' Credit Cards, passports and many other important documents have built-in security features that prevent counterfeiting. These hidden security features could be emblems, letters, multi-coloured invisible fibres or just fluorescent numbering patterns, which become visible under ultraviolet light. Also, there are watermarks provided in the currency, which become visible under white light. Indian currency also has micro printing, which can be viewed under a magnifying glass.

Use Godrej's "3rd Eye" and protect yourself and your hard-earned money from falling prey to unscrupulous operators' efforts to defraud you and the nation.

Can be used to identify the genuineness of:

- » Currency notes
- » Credit Cards (Master / Visa / American Express / Diners)
- » Passports
- » Traveler's cheques

Disclaimer: Please note that UV detection is only a first line of detection, to help the user to determine the genuineness of the document (subject to the document having UV detectable security features built in). In the event of non-performance of the unit, the supplier's liability is limited only to the servicing / replacement on chargeable basis of the defective part, at the discretion of the company. The supplier / company is not liable for any consequential damages due to non-performance of the product.

Specifications:

- 1x11W Heavy-duty H Type Ultraviolet Tube
- 1x11W Heavy-duty H Type White Tube
- Gross Weight:** 1 kg
- Power Supply:** AC 220V/50Hz
- Power Consumption:** 12 W
- Temperature Limited Use:** -5 ~ 40 degree
- Detection Method:** 6 inch UV Fluorescent tube and White light tube

*Also available without Magnifier Option
