Mainstream Series

BenQ
Enjoyment Matters

Life is splendid with BenQ MP611.

Versatile BenQ MP611 provides high quality vision for
achievement and amusement of your life.

DLP™ technology by Texas Instruments offers crystal clear images with superior quality.

Whisper-Quiet

BenQ has created a more efficient ventilation design that circulates more air through the inside of the MP611 more quickly. The improved airflow means the MP611 can keep its cool even with its cooling fan running slower, and thus more quietly. How quietly? The MP611 runs at just 24dB in its power-saving mode, making it literally whisper-quiet.

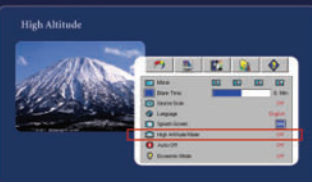

Smart Enough to Turn Itself Off

Another design touch you'll appreciate is the MP611's auto-off feature, which shuts the projector down if no input sources are detected after a set time, conserving power and preventing possible overheating.

Tough Enough

The MP611 even performs reliably in harsh environments, such as high altitudes, thanks to its special operating modes. These modes automatically adjust the cooling fan speeds and other settings to ensure optimal operation whatever the ambient conditions.

Your Best Partner for Presentations

The MP611 doesn't just give you the performance you need to deliver knockout presentations, but it helps you do it easily with handy features like the MyScreen software, power on/off alert, panel key lock, and presentation timer.

Right on Time

Both you and your audience will appreciate the built-in timer that helps you keep the presentation at the right pace and finish with a flourish. An unobtrusive on-screen timer lets you keep track of how much time you have remaining, while your audience is freed from wondering where you are in your presentation so they can concentrate on you and the content you are presenting instead.

Stay Focused

The MP611 provides a discreet alert that lets you know when the projector has powered on before a presentation or finished cooling afterwards, so you can stay engaged with your audience without needing to look at visual indicators. Just wait for the ring tone starts and you can unplug or start using the projectors.

Do It without a Hitch

There are few things as annoying as accidentally hitting a control button on a projector and derailing your presentation. To keep each and every presentation glitch-free, BenQ has outfitted the MP611 with a panel key lock to prevent just such annoyances.

Make Your Mark

The MyScreen software makes it a snap to create a custom start-up screen, like a photo or a company logo, for an impressive special touch. Connect the MP611 to your PC with a common RS-232 cable (optional) and start up MyScreen. MyScreen will prompt you to select the image file you want to use, and then upload it to the MP611 so you can put your personal stamp on every presentation.

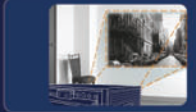

Performance without Peer

Whether you're putting on a presentation for a key client or enjoying a favorite movie at home, you want a projector that won't compromise the experience in any way. That's why BenQ built the MP611 to deliver the brightness, high contrast ratios, and special application modes you need for any display task.

A Bright Idea

BenQ realizes that not every presentation or movie will have the benefit of a pitch-dark room, so that's why it has used a powerful 2400-lumen lamp that ensures a bright picture even in sunlit rooms. And regardless of the lighting conditions, that means the MP611 can deliver the best possible viewing experience.

Making a Difference

To ensure that even subtle differences in tints are brought out, the MP611 provides an astounding 2000:1 contrast ratio. The result is extraordinarily crisp rendering of the finest details for utterly realistic video.

Beautiful, Even on a Blackboard

For extra flexibility and convenience, BenQ has added a blackboard mode to the MP611. That means even in a classroom or other venue where only a blackboard is available for use as a makeshift projection screen, you can still display legible text, clearly rendered images, and crisp video. Simply switch the mode on and let the MP611 handle all the needed adjustments.

Multi-Function Connectors

Color coded connectors make setup a breeze !!

- 1 Rear IR
- 2 RS232 control port
- 3 VGA in supports: PC / RGB
- 4 Video Socket
- 5 S-Video Socket
- 6 Audio Socket
- 7 Kensington Anti-Theft Lock Slot
- 8 VGA out : PC / RGB

MP611 Remote Control

- 1 Power
- 2 Freeze
- 3 Directional arrow to select the desired manual items
- 4 Keystone buttons
- 5 Presentation timer set up keys
- 6 Auto synchronization
- 7 Source switch
- 8 Blank
- 9 Picture mode switch
