

AIRplus® in action

AIRplus®

Air-filled films, pouches and forming equipment

Now experience ITW Industrial Packaging's expertise and trust for inside-the-box cushioning.

ITW Cushioning introduces air filled cushioning films and pouches for safe product arrival and quality machines for forming the cushioning material. The cushioning materials are light weight and lower shipping costs. They are formed and inflated in-situ, thus reducing storage space and inventory handling requirements.

AIRplus® combines reliable protection with multiple uses and helps increase packaging efficiency.

ITW's inside-the-box protective packaging products ensure safe arrival of your products

AIRplus® advantages

Clean and dust-free protection

Strong and durable

Reduces shipping costs

Reusable and recyclable

Reduces storage space - formed on demand

Small foot print

High speed

AIRplus®

AIRplus® Cushion Film

AIRplus® Cushion Film is divided into 16 small air chambers making it suitable for wrapping, bending and folding around products for multiple uses and optimum protection.

AIRplus® Cushion Film is a cost effective packaging solution that can serve two protective functions in the same package - it is strong enough to cushion and protect your products, and its light weight serves as a void fill.

AIRplus® Void Film

AIRplus® Void Film offer fast, clean and convenient void filling air-pouches in different shapes and sizes to suit your packaging requirements. Further, the machine is fast and conveniently integrates into your packaging line. It serves as an effective void filler, a durable block and brace product, and a reliable cushioning material for light to medium weight objects.

AIRplus® Machines

AIRplus® Machines

- Tabletop mount or stand that holds up to 3 rolls of film for high speed production
- Simple operation - easy to program and load
- Low maintenance - reduces downtime
- Very fast at 13 linear meters/minute
- Durable, lightweight and portable with small footprint
- Easy installation - 120 V / 230 V
- Very quiet uses ambient air instead of compressed air from noisy compressors

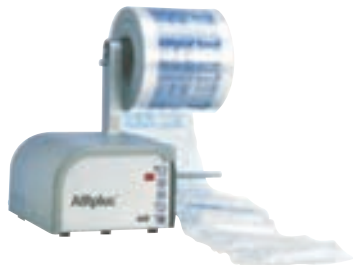

AIRplus® machines are fast, compact, portable and extremely easy to operate. All AIRplus® models are completely programmable, offer quick and easy loading, and are amongst the most reliably built in the industry. With their small footprint and large production capacity they fit easily into any packaging environment – regardless of volumes. In addition, AIRplus® offers optimum flexibility with multiple packaging options.
