

## Substitute for Metal Body Wrap

**Recyclable**  
**Eco-friendly**

**Moisture resistant**  
**Impact resistant**

**Reusable**  
**Lightweight**

### Features and advantages

METWRAPP is manufactured from polypropylene. It has a two or three layer structure with either one or both the surfaces with plain sheet and a middle layer of bubbles that are thermoformed and welded on the plain sheets to form a homogeneous structure. Bubbles have a high contact area. This provides high compression resistance and also equal strength in all directions.

- 100% polypropylene - rust proof
- Higher thickness provides necessary cushioning effect
- Precut side disc sheet of 1.8 meter dia as a single sheet
- Light weight and no sharp edges - safe to use
- Cost effective
- Oil free product
- Better adhesion of tape

# METWRAPP

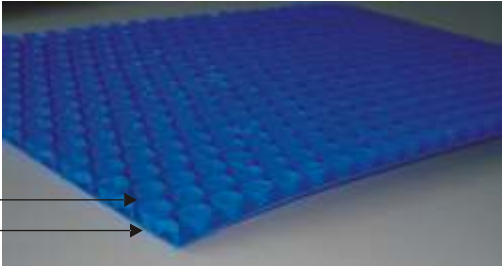

Virgin polypropylene bubble guard sheet

## Substitute for Metal Body Wrap

### Specifications and range

METWRAPP is available in two varieties

- Two layer bubble guard sheet is specially designed for top sheet and inner dia applications to take the shape of the product. Ensures product protection and aesthetic look of the pack.
- Three layer bubble guard sheet is designed for side disc application. The stiffness and rigidity provides the necessary cushioning required.

METWRAPP Range	
Lite	
Standard	
Ultra	
Shield	

#### Notes:

The range is available in 2 or 3 layers

Bubble dia 8 mm
