

The flexibility of PAPERplus® allows you to use only one cushioning material across your product range! Now there is no need to maintain stocks for molded trays, corrugated sheets, shredded paper and still worry about your product's safe arrival! Trust PAPERplus® for all your cushioning requirements.

PAPERplus® provides superior protection to your goods by

- Not transferring the impact to your product
- Absorbing a wide range of shocks and stresses, from point pressure and box drops to stacking pressure
- Keeping the cushioning effect intact even after use due to its unique inherent 'spring-back' force

**Other PAPERplus® Classic models**

**Single Tabletop**

Size	838mm H x 965mm W x 1575mm D
Weight	171 kg
Power	210-220V
Speed	12.8 meters/minute
Paper	Single, double or three-ply are standard

**Double Tabletop**

Size	838mm H x 1397mm W x 1905mm D
Weight	196 kg
Power	210-220V
Speed	12.8 meters/minute
Paper	Single, double or three-ply are standard

**Classic Horizontal**

The Classic Horizontal extends over your packing station or packing line to conveniently and rapidly deliver PAPERplus® pads where you need them, when you need them.

Size	1778mm H x 762mm W x 1524mm D
Weight	160 kg
Power	210-220V
Speed	Standard - 12.8 meters/minute High Speed - 36.5 meters/minute
Paper	Single, double or three-ply are standard

## Inside-the-box packaging materials and forming equipment

Now experience ITW Industrial Packaging's expertise and trust for inside-the-box cushioning.

ITW Cushioning introduces PAPERplus® paper based cushioning pads for safe product arrival.

PAPERplus® is a dependable paper system for cushioning, filling, blocking and bracing. The flexibility of PAPERplus® packaging is that it provides optimized cushioning and maximum safety for goods in transit. The systems are available in various configurations, all designed for seamless integration into production processes. PAPERplus® is formed in-situ, saving time and space and inventory handling requirements.

# PAPERplus®

## Inside-the-box packaging materials and forming equipment

### PAPERplus®

Economical void-fill
Superior cushioning and protection
Tearing and perforation resistant
Recyclable and reusable
Formed on-demand
Easy to use

### PAPERplus® - durable, strong, protective and versatile for all packages

The PAPERplus® patented crimping technique creates an ultra-strong mattress that provides the bulk and durability needed to absorb, cushion and protect heavy, fragile, or awkward items - or deliver superior cushioning and void-fill for more standard packaging applications. PAPERplus® has been proven to provide a thicker pad while delivering significantly better compression strength than competitive paper products. Quite simply, you get better protection using PAPERplus®.

The PAPERplus® Crimp Benefit: Better protection. Fewer pads.

The PAPERplus® pad's high level of integrity resists tearing and perforation, and ensures stability in your packaging. Also, where you use lengths of corrugated sheets or messy shredded paper, PAPERplus® provides a superior solution by providing far greater volume for the same length of paper.

### PAPERplus® Classic Vertical Machine

**Adjustable and flexible:**  
180° directional chute lets you move and adjust to different operator height and work environments - even against a wall.

**Safety:**  
Safety features include two easily accessible emergency stop buttons on each machine to ensure that your employees are always protected - just like your product. The machine is equipped with sensors that will detect immediately any malfunctions and stop the operation of the machine.

**Mobility and control:**  
With nine modes of operation, the programmable and movable control pad gives operators full control of production, even from a distance. Produce pads on-demand or program production for multiple stations and/or multiple orders. This capability enables packers to be highly efficient, with minimal downtime. Units can be “locked-out” to simplify operators use.

**Hands-free operation:**  
Operators are even more productive using the foot pedal to control output - leaving hands free for packing.

### The PAPERplus® packaging line is a productive line

Ergonomically designed
Ease of operation
On-demand formation
Easy to load
Safe
Quiet and clean
Proven reliability
Flexible equipment options

### PAPERplus® advantages Efficient • Safe • Dependable

- PAPERplus® is safe**  
The unique compression technique means added volume – PAPERplus® cushions boast up to 30% more cushioning volume and higher compressive strength than other paper systems. PAPERplus® cushions protect, block and brace reliably and durably.
- PAPERplus® adapts to fit**  
Extreme flexibility is coupled with high strength, so any product can be easily packed using PAPERplus® cushion pads.
- PAPERplus® is simplicity itself**  
PAPERplus® machines and systems are easy to use and easy to load.
- PAPERplus® is both reusable and recyclable**
