

Triplast-IWL

Description-Liquid Integral Waterproofing admixture for concrete and plaster

Features / Uses:

- Increases cohesiveness in concrete / plaster
- Increases durability, by increase in impermeability
- Does not affect the setting time and strength
- Ready to use liquid, hence dispersion is better
- Reduces shrinkage cracks in plaster & concrete
- Economical in application

Dosage / Coverage

150-200 ml / 50 kg of cement

Packing: 250 kg drum / Bulk (9MT)

Typical Application

For waterproofing of concrete & sand-cement mortar used in basements, roof slabs, screeds, water retaining structures, bathrooms & balconies, etc.

Technical Information

- Colour : Brown Liquid
- Specific Gravity @30DegC : 1.180 +0.02
- Chloride content : Nil
- pH : min. 6
- Shelf life : 1 year
