

EZY Lift System for the Monument Builder Industry

Single person operation

Lifts and handles up to 2,000 lbs. easily, safely, quickly with complete control

No more loading, pulling, or pushing monuments onto ramps, platforms or tailgate

Faster loading and unloading in less than a minute

No need for forklift or crane; deliver monument to precise location, or remote location

Can be installed on pickups, John Deere ProGator, Kubota, flatbed truck or trailer

Eliminate back pain, hand and back injuries caused by lifting and sliding monument manually

Minimize damage to monument - positions monument down softly on ground or truck bed.
