

Ezy-Lift™ **Lift, Load, and Go!**

Lift and load large heavy cargo up to 2,000 lbs. easily and safely.

*Reduce the risk of
injury associated
with lifting heavy
cargo*

There are approximately **700,000 back related** injuries in the United State each year. **Eighty percent** of these injuries occur to the lower back and are associated with manual materials handling tasks.

According to the U.S. Bureau of Labor Statistics, back injuries account for **one of every five** injuries and illnesses in the workplace but consume more than **40% off worker's compensation dollars**.

The major causes of back injuries are improper lifting techniques, improperly stacked supplies, lack of safety procedures and training, short cuts, failure to maintain equipment and inattention. **Properly used Ezy-Lift™ can help reduce the incident of back injuries.**

*700,000
back-related
injuries
per year*

*40% of all
workers'
compensation
dollars*

Improve Safety with Ezy-Lift™ Lifting System

- Eliminate back and hand injuries caused by lifting and sliding heavy items manually
- No lifting, pulling, or pushing cargo onto ramps, platforms, or tailgates
- Distributes the load on all four corners of your pickup's bed-unlike corner mounted cranes or lift gates
- 4 position hand-held control allows the user to lift, position, load, and unload heavy or bulky cargo while standing clear of the load.
- Handles up to 2,000 lbs. with complete control
- The Ezy-Lift™ Lift System provides a safer work environment to help reduce injuries

Quicker turnaround - faster loading and unloading

Ezy-Lift™ is the new innovation that allows you to **lift, load, and go** independently and it looks great in your pickup too. Pickup trucks are made for hauling heavy loads from place to place. Old methods for loading and unloading can take lots of time and effort - Lifting, tugging, pulling, and straining to get cargo onto the tailgate and then pushing it into the bed often takes more than one person. Forklifts or cranes aren't always available costing you delays, time and money.

Bumper-mounted lift gates and cranes that stick up from the corner of your truck's bed are just too heavy and detract from your truck's appearance.

Ezy-Lift™ is the solution - it lifts and positions cargo for you easily, whenever and wherever you want.

The easy to use four position hand held controller allows the operator of the Ezy-Lift™ to precisely position the cargo in the truck, or on the ground, remaining a safe distance while loading or unloading.

Increase Productivity

- Single person operation
- Fast action loads or unloads cargo in about 45 seconds
- Deliver to remote locations - no need for a forklift or crane at the delivery site
- Faster loading and unloading
- Quicker turnaround on deliveries - more loads delivered in a day
- Minimize damage to cargo - positions cargo down softly, on the ground or in the truck bed
