

Compounding to your needs

Sudarsshan
polymer compounds & masterbatches

Sudarsshan

India's trusted manufacturer of high performance Polymer Compounds & Masterbatches.

We compound array of standard as well as custom engineering and commodity polymers. We also offer innovative solutions in Product Development, Engineering Plastic Replacement and R&D Team-up.

Sectors we serve -

Automotive

Home Appliances

Commodity Goods

Packaging

Agriculture & Irrigation

Textile

Few of our Clients

Haier

VOLTAS

and more...

Polymer Compounds

Our High Performance Engineered Polymers are specially designed to meet the high precision demands of engineering & commodity applications.

Our advanced compounding technology enables us to produce the process friendly polymers with best-in-class reproducibility.

Our Polymer Compounds

- PP
- PE
- Nylon
- ABS
- HIPS
- PC-ABS Alloy
- BOPP
- PBT
- PET
- Elastomers

Enhancers

- FR
- Talc
- Glass
- Talc & Glass
- CaCO₃
- EPDM
- UV
- BaSO₄

UL approved products available

You can count on us for advanced polymer materials as our compounds are nothing but engineered plastics.

Compounds Customized To Your Needs

Along with standard polymer compounds we also serve customized polymers as per the need of your product.

We study the end product application, molding process, required properties and formulate the perfect compounds. Properties like-scratch resistance, Impact strength, super tough, high gloss, reinforcement, resilience etc... you name it and we can compound it for you.

*No matter how unique your need is
you can count on us.*

Just Define your product specs

Choose the moulding process

*and we shall compound
an exact solution for you ...*

Cost Innovation Solutions - Engineering Plastic Alternates

- **Metal** → **Engineering Plastic**
- **Engineering Plastic** → **Other grades with Cost Innovation**

We provide solutions for optimizing performance & cost of compounds while preserving the basic functionality & specifications.

Our experience & expertise help us to design the perfect dynamics of cost and performance.

Engineered for future

We have patent applied product High Gloss Low Shrinkage Engineered Polypropylene compound as an alternate material for ABS & HIPS.
